TO : The Director  
FROM : Mr. Ladd  
SUBJECT: FLYING SAUCERS

DATE: July 9, 1949

[REDACTED] advised that Walter Winchell had received a letter from [REDACTED], Los Angeles 7, California. Mr. [REDACTED] read the letter to me and it was very well written, obviously by a man of intelligence. In this letter [REDACTED] stated that in August of 1947 he left Los Angeles for the mountains and started hiking through the mountains. About 10:00 A. M. he was lying on the ground when he observed about one-half block away from him a large silver metal, greenish in color, shaped like a child's top and about the size of the balloons used at County Fairs. He stated that there appeared to be two windows in the object and portions of metal appeared transparent and that he gained the impression that there was some life within this object although he saw no persons. The object appeared as though ~~was~~ as a pressure chamber. He stood up and waved towards this object and this so-called flying saucer was off the ground in a second, knocking [REDACTED] to the ground. In its flight he stated that its power was silent and he raised the question as to whether this was ~~in~~ an inter-global landing on our planet. He thought that it might be a device to land in our planet because the occupants of another planet had become curious as to the reaction caused by the explosion of the atomic bomb causing trouble in an expanded universe. He left the question as to whether it was possible that the occupants of another planet might have solved the theory of negative gravity.

Mr. [REDACTED] stated that this letter indicated a very good knowledge of physics and that he thought it would be interesting to check into Jones' background and then possibly interview him about this alleged flying saucer. Mr. [REDACTED] stated that it would appear that [REDACTED] may have actually seen a flying saucer, that in any event it made an awfully good story and he requested that the Bureau keep the matter in confidence.

I would recommend that the Los Angeles Office discreetly check into the background of [REDACTED] and thereafter interview him for the purpose of determining any facts he possesses about flying saucers in order that it may be determined whether his story is in any way accurate.

Mr. D. M. Ladd  
SUBJECT: FLYING SAUCERS

I took a call from [REDACTED] by reference from your office. He referred to his call of last Saturday relative to a letter Mr. Winchell received from [REDACTED] a man in Los Angeles concerning flying saucers. He stated that Winchell wanted to do a column on this letter if the Bureau had no objection.

I told him that whatever he did with reference to writing the story concerning this letter was entirely up to him and wouldn't affect anything the Bureau was doing. I suggested that he might desire to check with the Air Corps inasmuch as the handling of flying saucers was a matter of primary interest to them. He stated, "To hell with the Air Force. He just didn't want to release the information if it would affect the Bureau".

You will recall the telephone conversations about Mr. [Redacted] 37th Street, Los Angeles, California, and the information furnished by him on the subject of flying saucers.

I thought you would like to know that efforts made to locate Mr. [Redacted] have been unsuccessful and casual inquiry in the vicinity he mentioned did not develop information about any one who is acquainted with him.

I thought you might wish to consider the possibility that the original letter in this matter may have been a print.

O Flying Success

Fellow Americans,

I am writing the same letter to all three Despartm on August 1st. I wrote a letter, and mailed it on august to the Air Force Intelligence telling my views of a saucer. In about four days the physicist and Scott gave out a report of findings identical to my report. Now if I have hit upon the meaning of a flying saucer I would like to get the credit for it. I have read to believe my ideas have been hijacked. It should be easy to find out. When did Mr. Scott start his experiment? Which office did my letter go through? Was my letter placed on file? It had a return address if you cannot find it that proves it was destroyed and the information used.

I have much better working proof of my theory than Scott, which has been before me all along, until I hit upon the idea.

The solution should not have been published. There is great deal more to it than that, which I can explain. The idea should have been worked out thoroughly and secretly. Rainmakers could probably do a great deal of harm with the answer. There is a possibility that it could meddled INDEXED - 61 RECORDING - 61 153894 777 100% - different type of air warfare. Dr. [REDACTED] stated that the planes went over the lake and suddenly dropped objects, at first thought by him to be parachutes. He continued that these objects fell straight for a short time, then suddenly spurted vapor and at a high rate of speed flew off in a southwesterly direction.

Dr. [REDACTED] was unable to identify the nationality of the planes, but stated that they had twin trails of bluish smoke. He further stated that the objects which had been dropped from the planes had single trails of bluish smoke.

Its my opinion that there devices

Tanks filled with Helium gas under

with the north poles outside.  
When an iron metal object approaches  
them they are repulsed at the same

5 SEPTEMBER 10 AM 1905

When you look at it from that slant  
you can see why and never be caught  
no matter how fast the pursuing plane  
goes they retreat at the same speed.

One good way to check that would  
be to have three planes to approach  
at the angles.

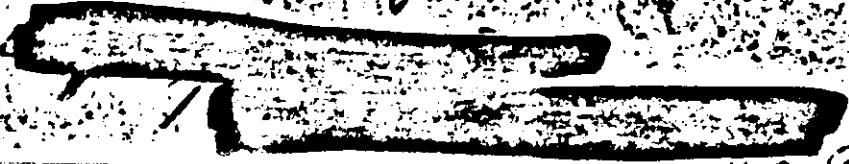

The retreating ~~of~~ <sup>of</sup> ~~one~~ <sup>one</sup>  
offset could not cross in front  
of any of the planes it would  
have to go straight ahead.

You try and get the north pole of a

you will see what I mean.

One sees, a steel bar - try in space

## FLYING SAUCERS

Since 1944 there have been experimental weapons which should now be in production. The one about which there has been so much discussion is a V-Weapon which has a disc-like round body, about 48.50 metres in diameter and has by way of emission 45 to 50 automatic (word not legible). With the setting off of the disc these rotate around a plexi-glass sphere in the center in which are located the (word not legible) and guiding apparatus for distance flights. Inside the sphere there is also enough space for high explosive atom bombs. These weapons from 30 to 35,000 kilometres. V-Weapon Konstrus (Technician?) Riedel (or Riedet), Germany, says it is a typical V-Weapon on which he himself worked. I am positive that the truth is better than keeping people in ignorance.

Dear Sir:

I have been hearing so much about the objects called Flying Saucers that I begin to speculate as to whether we are the only Nation or country to witness such a display.

Of course it could be that those odd objects are pest filled Radar controlled waiting to be punctured. We have been so accused by another Nation that no doubt they have devised some diabolical plan to test on us.

I am not inclined to pass those over lightly, because I believe that those gadgets can be made and controlled to the extent of great numbers in groupings.

Also, I believe it is very unwise to make public the locations of sightings as many folk are prone to worry, and a state of mind like this is exactly what our enemy is seeking.

Any one wise enuf to perfect such would not only know their travel distance but also their location, therefore no talk or publications could benefit us in that.

TO : MR. A. H. E MONT  
FROM : V. P. KEAY  
SUBJECT: FLYING SAUCERS

RE: July 29, 1952

PURPOSE:

To advise at the present time the Air Force has failed to arrive at any satisfactory conclusion in its research regarding numerous reports of flying saucers and flying discs sighted throughout the United States.

DETAILS:

Mr. N. W. Philcox, the Bureau's Air Force Liaison Representative, made arrangements through the office of Major General John A. Samford, Director of Air Intelligence, U.S. Air Force, to receive a briefing from Commander Randall Boyd of the Current Intelligence Branch, Estimates Division, Air Intelligence, regarding the present status of Air Intelligence research into the numerous reports regarding flying saucers and flying discs.

Commander Boyd advised that Air Intelligence has set up at Wright Patterson Air Force Base, Ohio, the Air Technical Intelligence Center which has been established for the purpose of coordinating, correlating and making research into all reports regarding flying saucers and flying discs. He advised that Air Force research has indicated that the sightings of flying saucers goes back several centuries and that the number of sightings reported varies with the amount of publicity. He advised that immediately if publicity appears in newspapers, the number of sightings reported increases considerably and that citizens immediately call in reporting sightings which occurred several months previously. Commander Boyd stated that these reported sightings of flying saucers are placed into three classifications by Air Intelligence:

(1) Those sightings which are reported by citizens who claim they have seen flying saucers from the ground. These sightings vary in description, color and speeds. Very little credence is given to these sightings inasmuch as in most instances they are believed to be imaginative or some explainable object which actually crossed through the sky.

(2) Sightings reported by commercial or military pilots. These sightings are considered more credible

RECORDED: 16

NFP:hke

67-83894-286

by the Air Force inasmuch as commercial or military pilots are experienced in the air and are not expected to see objects which are entirely imaginative. In each of these instances, the individual who reports the sighting is thoroughly interviewed by a representative of Air Intelligence so that a complete description of the object sighted can be obtained.

(3) Those sightings which are reported by pilots and for which there is additional corroboration, such as recording by radar or sighting from the ground. Commander Boyd advised that this latter classification constitutes two or three per cent of the total number of sightings, but that they are the most credible reports received and are difficult to explain. Some of these sightings are originally reported from the ground, then are observed by pilots in the air and then are picked up by radar instruments. He stated that in these instances there is no doubt that these individuals reporting the sightings actually did see something in the sky. However, he explained that these objects could still be natural phenomena and still could be recorded on radar if there was some electrical disturbance in the sky.

He stated that the flying saucers are most frequently observed in areas where there is heavy air traffic, such as Washington, D.C., and New York City. He advised, however, that some reports are received from other parts of the country covering the entire United States and that sightings have also recently been reported as far distant as Acapulco, Mexico; Korea and French Morocco. He advised that the sightings reported in the last classification have never been satisfactorily explained. He pointed out, however, that it is still possible that these objects may be a natural phenomenon or some type of atmospherical disturbance. He advised that it is not entirely impossible that the objects sighted may possibly be ships from another planet such as Mars. He advised that at the present time there is nothing to substantiate this theory but the possibility is not being overlooked. He stated that Air Intelligence is fairly certain that these objects are not ships or missiles from another nation in this world. Commander Boyd advised that intense research is being carried on presently by Air Intelligence, and at the present time when credible reportings of sightings are received, the Air Force is attempting in each instance to send up jet interceptor planes in order to

obtain a better view of these objects. However, recent attempts in this regard have indicated that when the pilot in the jet approaches the object it invariably fades from view.

RECOMMENDATION:

None. The foregoing is for your information.

DATE: July 29, 1952

On July 28, 1952, at the Weekly Intelligence Conference, Captain [REDACTED], Office of Special Investigations, 4th Air Force Base, Bolling Field, advised the representative of the FBI, Washington Field Office, over the prior weekend, his office had received reports concerning the observation of aerial objects. Captain [REDACTED] referred to a phone call made to his office by Special Agent [REDACTED] of the Washington Field Office, furnishing to OSI the identity of a woman who reportedly had observed an aerial object. [REDACTED] praised the WFO for the expeditious notification in this instance.

Captain [REDACTED], Colonel [REDACTED], [REDACTED] superior office, and Special Agent [REDACTED] in a conference on July 28, 1952, discussed the matter of immediate notification of OSI. This conference resulted in the request by Colonel [REDACTED] and Captain [REDACTED] that in the event, whenever information is received by the FBI, in which it is alleged that someone has observed a "Flying Saucer", this information be immediately relayed to Captain [REDACTED] office. It is to be noted that this office may be reached by dialing Code 1261 and asking for Extension 509. Captain [REDACTED] said this number should be called under these circumstances at any time, day or night.

Captain [REDACTED] stated that the Air Force is greatly concerned about this matter of aerial objects and said that the Air Force Intelligence would appreciate the execution of the requested procedure mentioned above. It is suggested that the Bureau bring this matter to the attention of its night supervisors, since these night supervisors also receive complaints from persons outside of the Bureau and may receive information concerning the observation of aerial objects.

Mr. J. Edgar Hoover, Director  
Federal Bureau of Investigation  
Washington, District of Columbia

Dear Mr. Hoover:

Perhaps this is a little out of your line of endeavor, however, I feel that perhaps you or your organization might be able to give me some information concerning the following matter.

From the first time it was written up in the press I have been keenly interested in strange celestial phenomena such as the flying disks popularly called "flying saucers".

Now out of all the thousands of people who have reported sightings not all of them have had too much to drink, nor could they have been victims of optical illusions, retinal retention, or hallucinations. Some of the objects sighted could not have been jet craft, guided missiles, or rockets, neither could they all have been weather instruments. Unretouched and undoctored photographs have given evidence that someone must have seen something.

It seems that both civil and military authorities are most willing to proclaim what the objects are not. I feel there is more to the matter than meets the eye. My decision to write you was based on the thought I would get straight answers.

Do you have any ideas or data on this subject? What are your opinions? If not, where might I write for such information? Any kindness, consideration, or information which you can extend toward me concerning this matter will certainly be most sincerely appreciated.

Very truly yours,

## INFORMATION CONCERNING FLYING DISCS

BUREAU FILE 62-83894, Serials 80, 184, and 225

During my absence at 1:50 A.M. today, [REDACTED] in the office of Drew Pearson, called and talked with Dick. [REDACTED] stated Pearson has been in contact with Dr. [REDACTED] (Phoenix telephone number [REDACTED]) concerning photographs which the above captioned took of flying discs in the Phoenix area in July of 1947.

[REDACTED] states that Dr. [REDACTED] told Pearson today that the FBI borrowed his negatives of the flying discs and when asked for their return the FBI told Rhodes the negatives were not available.

[REDACTED] asked whether there is any truth to this statement of [REDACTED] and what the FBI knew about him.

It appears that Pearson is interested in using the photographs on his television program and is desirous of borrowing them from the Bureau or having them returned to Dr. [REDACTED]

### BACKGROUND:

Bureau files reflect that on August 29, 1947, a Mr. [REDACTED], called at the Phoenix Office exhibiting credentials reflecting he represented A-2, Fourth Air Force, Hamilton Field, California. He asked an Agent to accompany him to interview [REDACTED] who previously reported the photographing of a flying disc in Phoenix on the afternoon of July 7, 1947.

The Phoenix Office contacted SAC Harry Kinball of the San Francisco Office and Mr. [REDACTED] verified the fact that [REDACTED] came to Phoenix as a representative of Colonel [REDACTED] of Hamilton Field, and it was suggested the Phoenix Office assist [REDACTED] not in investigating [REDACTED], but in simply talking with Dr. [REDACTED]

RECORDED (S)

By letter dated September 4, 1947, the Phoenix Office set forth in four pages the results of this interview and stated [REDACTED] had requested the negatives from [REDACTED] who did not have them in his immediate possession. [REDACTED] stated, however, he would deliver them to the FBI the following morning for transmittal to [REDACTED] at Hamilton Field, California.

Memorandum to Mr. Tolson

June 4, 1952

On the morning of August 30, 1947, [redacted] delivered the negatives to the Phoenix Office at which time they were accepted with the understanding they were being given to Mr. [redacted], a representative of the Army Air Force Intelligence, United States Army, and that there was little, if any, chance of his getting the negatives back. Mr. [redacted] turned the negatives over to the FBI with the full understanding they were being given to the Air Force and he would not get them back. (62-83894-80, page 4)

On April 17, 1950, Mr. [redacted] advised the Phoenix Office that True Magazine would like to secure the photographs which he had made available to Air Force Intelligence. At that time Rhodes was referred to OSI, Fourth Air Force Base, San Francisco, California, since they had been made available to this agency by the Phoenix Office on August 30, 1947.

By letter dated June 8, 1949, the Phoenix Office advised the Bureau that on the previous date Mr. [redacted], OSI representative, Phoenix, Arizona, called the Phoenix Office stating he had been requested by his superiors in San Francisco to obtain detailed information concerning the negatives since [redacted] had requested their return. [redacted] pointed out that [redacted]'s recollection on the matter was "hazy." OSI requested and was given with Bureau approval a memorandum setting out essentially the information related above concerning this matter.

ACTION TAKEN:

Mr. [redacted] was advised by Vick that the FBI did not have in its possession the negatives referred to by Mr. [redacted] and in fact [redacted] knew full well the FBI turned them over to Air Force Intelligence representatives, Fourth Air Force, Hamilton Field, California, on August 30, 1947, with the understanding he might never have them returned.

[redacted] was advised the FBI did not investigate this matter, did not investigate [redacted] and had no interest whatsoever in the matter other than to accompany the representative from Hamilton Field while interviewing [redacted]. [redacted] was told that for these reasons, of course, we had no information concerning the reliability of Rhodes.

[redacted] was most appreciative for receiving this information and said he would contact the office of Special Investigations of the Air Force for what assistance they might be to him. He said also he would straighten out [redacted] informing him the FBI only as a courtesy to the Air Force representatives received the negatives from him and transmitted them.

MISCELLANEOUS - INFORMATION CONCERNING

FLYING DISCS

Reference is made to the memorandum captioned as above dated June 10, 1952, from Mr. [REDACTED] to Mr. Belmont, which requested that OSI be contacted to determine if they turned over negatives of photographs of flying discs taken by the above-captioned individual to Mr. [REDACTED] who works for Drew Pearson.

Lieutenant Colonel [REDACTED] and Lieutenant Colonel [REDACTED] of OSI were both contacted and both advised that no inquiries had been received by OSI from [REDACTED]

The Bureau's Air Force Liaison Representative then contacted Colonel [REDACTED] of Air Force Intelligence (A-2) who likewise advised that no inquiries had been received by the Office of the Director of Intelligence from [REDACTED] or anyone in Pearson's office. It is noted that matters involving flying discs are handled by A-2. Colonel [REDACTED] advised that it was possible that any inquiries made by Drew Pearson's office would be made in the Office of the Public Information Officer of the Air Force. However, Colonel [REDACTED] contacted the Public Information Office, and he was advised that no inquiries had been received from Drew Pearson's office regarding flying discs and no photographs or negatives of photographs of flying discs had ever been furnished to Drew Pearson's office.

Colonel [REDACTED] advised that ordinarily when information regarding flying discs is received by Air Force representatives in the field, the information is referred to the Air Technical Intelligence Center, Wright-Patterson Air Force Base, Dayton, Ohio, for research and correlation.

ACTIONS:

None. The foregoing is for your information.

## FLYING DISCS

### PURPOSE

To recommend that Bureau Liaison contact OSI to determine whether photographs allegedly taken by the captioned individual of a flying disc in 1947 were furnished by OSI to the office of Drew Pearson.

### BACKGROUND

Bureau files reflect that on August 29, 1947, a [REDACTED], called at the Phoenix Office exhibiting credentials reflecting he represented A-2, Fourth Air Force, Hamilton Field, California. He asked an Agent to accompany him to interview [REDACTED] who previously reported the photographing of a flying disc in Phoenix on the afternoon of July 7, 1947.

The Phoenix Office contacted SAC Harry Kimball of the San Francisco Office and Mr. Kimball verified the fact that [REDACTED] came to Phoenix as a representative of Colonel [REDACTED] of Hamilton Field, and it was suggested the Phoenix Office assist [REDACTED] not in investigating the matter, but in simply talking with Dr. [REDACTED].

By letter dated September 4, 1947, the Phoenix Office set forth in four pages the results of this interview and stated [REDACTED] had requested the negatives from [REDACTED] who did not have them in his immediate possession. [REDACTED] stated, however, he would deliver them to the FBI the following morning for transmittal to [REDACTED] at Hamilton Field, California.

NAP

On April 17, 1950, Mr. [redacted] advised the Phoenix Office that True Magazine would like to secure the photographs which he had made available to Air Force Intelligence. At that time [redacted] was referred to OSI, Fourth Air Force Base, San Francisco, California, since they had been made available to this agency by the Phoenix Office on August 30, 1947.

By letter dated June 8, 1949, the Phoenix Office advised the Bureau that on the previous day Mr. [redacted], OSI representative, Phoenix, Arizona, called the Phoenix Office stating he had been requested by his superiors in San Francisco to obtain detailed information concerning the negatives since [redacted] had requested their return. [redacted] pointed out that [redacted] recollection on the matter was "hazy." OSI requested and was given with Bureau approval a memorandum setting out essentially the information related above concerning this matter. (62-83894, Serials 80, 184, and 225)

#### RECENT DEVELOPMENTS

On June 4, 1952, Mr. [redacted] in the office of Drew Pearson, called and talked with Special Agent Wick. [redacted] stated Pearson had been in contact with the captioned individual concerning photographs which [redacted] had taken of flying discs in the Phoenix area in July of 1947. [redacted] stated the subject told Pearson the FBI borrowed his negatives and when he asked for their return the FBI told him the negatives were not available. [redacted] inquired whether there was any truth to [redacted] statement and what the Bureau knew concerning him. It appeared that Pearson was interested in using the photographs on his television program and was desirous of borrowing them from the Bureau or having them returned to the subject.

Mr. [redacted] was advised by Wick that the FBI did not have in its possession the negatives referred to by Mr. [redacted] and in fact [redacted] knew full well the [redacted] turned them over to Air Force Intelligence representatives, Fourth Air Force Hamilton Field, California, on August 30, 1947, with the understanding he might never have them returned.

[redacted] was advised the FBI did not investigate this matter, did not investigate [redacted], and had no interest whatsoever in the matter other than to accompany the representative from Hamilton Field while interviewing [redacted]. [redacted] was told that for these reasons, of course, we had no information concerning the reliability of [redacted]

[redacted] was most appreciative for receiving this information and said he would contact the office of Special Investigations of the Air Force for what assistance they might be to him. He said also he would straighten out [redacted] informing him the FBI only as a courtesy to the Air Force representatives received the negatives from him and transmitted them.

It has been reported that Drew Pearson, on his television program of June 8, 1952, demonstrated photographs of flying discs. It is not known whether the photographs displayed by Pearson on his television program are those referred to in the captioned case.

RECOMMENDATION

In order to bring our file in this matter to an up-to-date status and to resolve the question raised by the subject, it is recommended liaison contact OSI and determine whether the photographs displayed by Pearson on his television program of June 8, 1952, are the photographs obtained from the subject in this case. Inasmuch as [redacted] indicated he would contact the OSI concerning this matter it is believed highly probable that is where the photographs of flying discs were obtained by Pearson's office.
